FintruX Network innovates smart solutions for underserved startups and SMEs. We aim to be the one-stop resource and solution provider for business growth and sustainability.

Our technology is developed by a dynamic team of skilled professionals and supported by Robocoder Corporation, which has over 20 years of enterprise software development experience.

TruX - the world's first Smart Business Financing Platform, is a simple and powerful platform that empowers businesses to grow globally with **TRUST** (**T**ransparency, **R**eputation, **U**nderstanding, **S**ecurity, **T**ime).

On the TruX platform, businesses create a **'Trust Profile'** which captures a holistic understanding of businesses and is the foundation for true business relationships between all stakeholders. Businesses can connect within the global ecosystem to quickly secure lower costs, higher sales, and easier financing.

All business activities on TruX are powered by **smart contracts**, which automate processes and improve the overall user experience. Businesses can negotiate credit terms based on their global credit reputation and transact via smart credits. Additionally, FintruX Network implements 4 levels of **credit enhancements**, benefiting businesses with risk reduction.

<u>In summary</u>
TruX empowers businesses to:
Establish global credit reputation via **'Smart Network'**;
Increase purchasing power via **'Smart Marketplace'**;
Negotiate credit terms and transact via **'Smart Credits'**.

Join us and change the future of financing for your business today!
